Eurogress Aachen, Germany
October 9th-11th, 2023
The world of mobility is changing.

The increasing climate challenge that our society is facing dominates every day's news. Undiscussable, one very important part of the influencing factors is the transport and mobility sector. Therefore, politicians are intensively discussing mobility strategies of the future. It is obvious, we need to be innovative and must drive various technologies in order to meet the diverse demands of different users and markets. And this is where we come in as mobility experts and engineers from research and industry. Since this challenge is a worldwide task that we can only solve together, we are looking forward to this year's international exchange at the 32nd Aachen Colloquium Sustainable Mobility.

The 32nd Aachen Colloquium Sustainable Mobility

The selected lecture program offers insights into various topics in more than 100 technical presentations and discussions. The speakers will present research results and innovations from diverse fields, such as drive technologies, digitalization, automation, complete vehicle, mobility concepts and driving dynamics. Discussions will be sparked by dedicated strategy sessions and new interaction formats.

The opening and closing plenary sessions frame the program with high-level representatives from selected companies. We are looking forward to welcoming Arnd Franz, CEO of MAHLE, Gürcan Karakas, CEO of TOGG, Frederik Zohm, Executive Board Member for Research and Development at MAN and Atsushi Ogawa, COO at Honda Motor R&D at the opening plenary session. Matthias Jurytko, CEO of Cellcentric, Peter Laier, Member of the Board of ZF Group and Gerrit Marx, CEO of IVECO group and further invited guests will join the plenary discussion on the topic “Sustainable Transport under ESG Perspective” which will round up the Colloquium on Wednesday.

The latest research results from universities will be presented in the poster session. The speakers will upload a pitch in our event app which is available during the Colloquium and the posters will be part of the exhibition.

Between the lectures, you will have time to visit the technical exhibition. More than 40 international companies will present their products, services and ideas. Get personally in touch with the exhibitors and experience new innovations first hand.

Outside of the event location, you can experience mobility yourself in our Circus Minimus where you can drive and test novel vehicle concepts. Moreover, outstanding vehicles with a street licence are available for a tour around Aachen. Besides the technical program, the event offers various opportunities to network and exchange ideas with speakers, exhibitors and fellow participants, for example during the opening evening on Monday or the traditional banquet in the historic city center of Aachen on Tuesday.

The Aachen Colloquium takes place not only in Aachen, but worldwide online. Participants from all over the world can easily follow the lectures, ask questions and connect with the attendees digitally.

We are very much looking forward to your participation at the 32nd Aachen Colloquium Sustainable Mobility!
The important topics of sustainability and the mobility of the future are the focus of the 32nd Aachen Colloquium Sustainable Mobility. As Lord Mayor, I am particularly pleased about this, because here on site we are working intensively on the mobility turnaround. Only if we implement it can we achieve the climate protection targets.

Our mobility should be safe, convenient and affordable for everyone. It should be quiet, clean and emission-free. We bear responsibility for future generations.

Aachen is part of the EU mission “100 climate-neutral and smart cities by 2030” and was recently awarded funding together with the cities of Münster and Mannheim. This gives us in Aachen a huge push forward in the implementation of climate neutrality. Therefore mobility is a very important building block in this.

You can learn about the latest research results and developments for sustainable, environmentally friendly mobility in the numerous presentations at the 32nd Aachen Colloquium Sustainable Mobility. Topics include automated driving, the latest battery systems, electric drives and strategies & concepts of the automotive industry.

The traditional event, which is a flagship for the city of Aachen, is jointly organized by Professor Stefan Pischinger and Professor Lutz Eckstein.

In order to achieve the common goal of sustainability, the focus is on networking. In the trade exhibition, there will be the opportunity to make contacts and exchange ideas in person. The Start-Up Area in the Eurogress, which has been created in cooperation with the digitalHUB, also invites visitors to do so. Those who want to experience vehicle concepts live will be in good hands at the vehicle presentations and the “Circus Minimus”. For example, one can marvel at small, compact e-scooters that can be used to quickly and effortlessly traverse the city center, e-motors that rely on the amplification of muscle power, and actuators that revolutionize maneuvering through dense city traffic. The event will conclude with a plenary discussion on “Sustainable Transport under ESG Perspective.”

I wish all participants an interesting exchange about opportunities, experiences and ideas. Discuss and use the technologies and concepts for a future-oriented mobility and let us shape the way to an emission-free future together!

After studying business administration, Arnd Franz started his career in 1992 with Deutsche Industrie-Holding GmbH & Co. KG, Frankfurt am Main, initially in Group Controlling and then as Commercial Director of several subsidiaries. He was then Commercial Director with TEV GmbH, Erlensee and Director Finance with Magna Seating Systems Europe GmbH, Lohr am Main. Franz, who was born in Stuttgart, joined MAHLE Tennex North America Inc., Murfreesboro (USA) as Managing Director in 2001. In subsequent years, he held various positions at the Stuttgart headquarters of the MAHLE Group: he was Director Controlling of MAHLE Filtersysteme GmbH from 2004, Member of the MAHLE Management Committee responsible for Aftermarket from 2006 and Member of the MAHLE Management Board responsible for Sales and Application Engineering and Aftermarket from 2013 to 2019 before becoming CEO of LKQ Europe.

Arnd Franz is committed to clean, safe, affordable mobility. He supports fair competition between the best technologies for a carbon-neutral future mobility. In his current role as MAHLE CEO he has launched a new strategy for the technology group. MAHLE 2030+ comprises three strategy fields: electrification, thermal management and efficient internal combustion engines that can run on hydrogen and other non-fossil fuels, such as e-fuels. Applying all available technologies is the fastest way to climate neutrality.
M. Gürcan Karakaş was born in Antalya in 1965 and grew up in Germany. In 1988 he graduated from Middle East Technical University (METU) with a degree in mechanical engineering. In the same year he joined Aselsan in Ankara. In 1990 he started his career at Bosch. In 2002 he joined the executive board and in 2004 he was promoted to CEO of Bosch Türkiye. In 2007 he took over the management of global sales and the Bosch Car Service network at the Bosch Automotive Aftermarket division in Karlsruhe. In 2011, he took over the management of marketing and sales and automotive strategies at Bosch headquarters. In 2013 he returned to active operational business and became a member of the Board of Directors of the Electrical Drives division with global responsibilities with a focus on the NAFTA and Asia markets.

After a long and successful career at Bosch, on September 1, 2018, he took over responsibility as CEO of the Turkish mobility technology and ecosystem provider TOGG.

Mr. Atsushi Ogawa joined Honda in 1998. After assigned to Fundamental Technology Research Center in Wako, he was engaged in the development of aerodynamic performance and high-efficiency engine of HondaJet, aerodynamic performance of F1, and so on. In 2005, he transferred to Automobile Development Center and worked on aerodynamics development for mass-production vehicles and racing vehicles, then in 2019, he became a Senior Chief Engineer Head of Dynamics at Innovative Research Excellence and Automobile Center. In 2020, he was appointed as the COO of Innovative Research Excellence. After that, he was appointed as the Managing Officer in 2022. Which leads to now.

Honda R&D Co., Ltd. is a company that develops advanced technology for Honda Motor Co., Ltd. (commonly called Honda), a Japanese automobile manufacture. Honda pursues enhancement in safety and other performance and reduction of environmental impact in mobility products including automobiles and motorcycles based on innovative technologies. Honda R&D Co., Ltd. plays a vital role in Honda’s technical development.
Dr. Frederik Zohm  
Executive Board Member for Research & Development  
MAN Truck & Bus AG

As Member of the Executive Board for Research and Development, Frederik Zohm strives for sustainable and fossil free transport solutions. The engineer with a doctorate from RWTH Aachen University has been working in the commercial vehicle industry for almost 20 years. Throughout his career, Frederik Zohm has worked at EvoBus, Mitsubishi Fuso Truck and Bus Corporation, Rolls-Royce Power Systems Holding, Daimler Truck and TRATON Group.

MAN Truck & Bus is one of Europe’s leading commercial vehicle manufacturers and transport solution providers, with an annual revenue of more than 11 billion € (2022). The company's product portfolio includes trucks, buses/coaches, vans and diesel and gas engines along with services related to passenger and cargo transport. MAN Truck & Bus is a company of TRATON SE and employs approximately 33,000 people worldwide.

Dr. Matthias Jurytko  
Chief Executive Officer  
cellcentric GmbH & Co. KG

Dr. Matthias Jurytko is CEO of the cellcentric GmbH & Co. KG. Prior to his current position, Dr. Jurytko was Head of the Mercedes-Benz Wörth plant. He has a background in business engineering and studied at the Karlsruher Institute for Technology (KIT). He obtained his PhD at the University of Hohenheim.

Dr. Jurytko joined the former Mercedes-Benz AG in 1990. After various stations in Stuttgart, Kassel, South Africa and Rastatt, he took over the controlling and accounting department at Mercedes-Benz Engines in Mannheim from 2001, before taking over responsibility for controlling of the Powertrain Division Daimler Trucks in 2006. In 2009, Dr. Jurytko moved to Gaggenau and became Head of Product Areas incl. torque converters, cutting and shaping technology, equipment and tool construction as well as international logistics. In 2011, he was given responsibility for the Mercedes-Benz Gaggenau plant.
“Sustainability is deeply rooted within ZF DNA and manifests in our processes and technologies” states Dr. Peter Laier, Member of the Board of Management of the ZF Group with responsibility for Commercial Vehicle Solutions and Industrial Technology, Production and India Region.

After completing his studies in mechanical engineering, Dr. Laier began his professional career at Continental in 2000. At the same time, he completed his Ph.D. in 2001 at the University of Stuttgart, Germany. At Continental, he assumed various management roles in Germany and Japan until 2012. After holding Board positions at Osram and Benteler International, Dr. Laier joined Knorr-Bremse in 2016, where he was a member of the Board with responsibility for the commercial vehicle division until 2021. Dr. Laier has been a member of the ZF Group Board of Management since January 2023.

ZF is a global technology company supplying systems for passenger cars, commercial vehicles and industrial technology, enabling the next generation of mobility. ZF allows vehicles to see, think and act. In the four technology domains of Vehicle Motion Control, Integrated Safety, Automated Driving, and Electric Mobility, ZF offers comprehensive product and software solutions for established vehicle manufacturers and newly emerging transport and mobility service providers. ZF electrifies a wide range of vehicle types. With its products, the company contributes to reducing emissions, protecting the climate and enhancing safe mobility.

With some 165,000 employees worldwide, ZF reported sales of €43.8 billion in fiscal 2022. The company operates 168 production locations in 32 countries.

Gerrit Marx has more than 20 years of experience in roles of increasing importance in different locations around the world and in a variety of industrial segments, with a specific in-depth focus on automotive industries. He holds a degree in Mechanical Engineering (“Diplom Ingenieur”) and an MBA (“Diplom Kaufmann”) from RWTH Aachen University, and a Doctorate in Business Administration from Cologne University.

From 1999 to 2007, Mr Marx worked at the global consulting firm McKinsey & Company, focusing on operational improvement programmes in the automotive and aerospace industries in Europe, Brazil, and Japan.

He joined Daimler AG in 2007 to head the global controlling function for vehicle and powertrain component projects, as well as market-entry / mergers and acquisitions for three truck brands in North America, Europe, and Asia. This led him to the role of President and Chief Executive Officer at Daimler Trucks China in 2009 and subsequently, President of Skoda China with Volkswagen AG, overseeing imports and joint venture business relations in both roles.

In 2012 Mr Marx joined the European leadership team of Bain Capital as a member of their portfolio group, driving and leading transformational change programs. This role also encompassed due diligence and merger and acquisition activities, with specific focus on automotive and industrial assets, and also included interim roles such as Chief Executive Officer of Wittur Group, a global Tier-1 supplier to the elevator industry.

Gerrit Marx joined CNH Industrial in January 2019 as President of Commercial and Specialty Vehicles.

Since the spin-off of Iveco Group from CNH Industrial on 1st January 2022, Mr Marx has served as Chief Executive Officer of the newly formed Company.
# Poster Presentations

## Poster 1
**Lukas Laarmann, FH Aachen**
Automotive Safety Approach for Air Taxis

## Poster 2
**Vinod Rajamani, FH Dortmund**

## Poster 3
**Ventseslav Yordanov, RWTH Aachen University**
The Chassis as a Data Source for the Digital Twin of the Road System

## Poster 4
**Alexander Lampkowski, FH Dortmund**
Acceleration behavior of commercial vehicles with regard to appending norms and guidelines for body and cargo security

## Poster 5
**Saud Sattar, Coventry University**
Real-Time In-situ Optical Analysis For Detecting Electrolyte Degradation In Li-ion Pouch Cells

## Poster 6
**Stefan Kraus, Forschungszentrum Jülich (IEK-3)**
Model-based scenario for a defossilized German transport sector

## Poster 7
**Fabio Fatigati, University of L’Aquila**
Development of an innovative Low Speed Sliding Rotary Vane Pump for Heavy duty Internal Combustion Engine cooling

## Poster 8
**Václav Jirovský, Czech Technical University in Prague**
Sustainable approach to car-sharing services

## Poster 9
**Harold Schock, MSU Michigan State University**
High-Efficiency, HigDilute Active Turbulent Jet Engine Enabled by Mechanical Prechamber Air Control

## Poster 10
**Shantanu Pardhi, Vrije Universiteit Brussel (VUB)**
Integrated multi-objective energy management of long-distance plug-in series hybrid coach

## Poster 11
**Daniel Sigmund, Technische Hochschule Köln**
Testing & Evaluation of a Low Voltage Inverter for In-Wheel Switched Reluctance Machines for Motorcars on a Testbench

Poster presentations as a pitch in our event app and in the on-site exhibition.

16:45  End of Colloquium
We love technology. And we understand it deeply. This enables us to pioneer ideas and shape strategies that keep our clients, partners and our people ahead of the game. Then we explore, challenge, test and learn – continually improving the solutions we implement and the ways we work together. This helps us develop world-class innovations – on and off the road. For a better future and a greater quality of life for everyone.

We drive innovation to help the world evolve.

Driving Experience: Circus Minimus

The way we travel has always been in a constant state of change. Driven by a continuous development process, the mobility solutions are designed to get us from A to B faster, further, more comfortably and, for some time now, more sustainably and in line with our needs. Especially in urban areas, the call for new possibilities and solutions that meet current and future requirements is becoming louder, especially for individual transportation.

The Circus Minimus of the Aachen Colloquium Sustainable Mobility offers you the opportunity to test such new vehicle concepts and innovative operating strategies, which for example rely on the amplification of muscle power through e-motors, actuators that revolutionize maneuvering through dense urban traffic, or simply small, compact e-scooters with which you can quickly and effortlessly cross the city center, directly in front of the Eurogress and thus gain an insight into the current state as well as future micromobility.

You will also have the opportunity to present your own concepts and discuss them with a broad audience of experts.

More information: 
https://www.aachener-kolloquium.de/en/information/program/test-track.html
At this year's technical exhibition you have the opportunity to get to know the latest mobility technologies and concepts. International companies present their innovations and are available for direct contact and exchange on site.

The traditional banquet on Tuesday evening offers culinary and musical delights in the historic buildings around the Aachener market place. Meet your business partners in a relaxed atmosphere to further deepen the impressions of the day together and use the opportunity to create new contacts.
November 27 – 29, 2023  
Aachen, Germany

**Topics**

- Acoustics of Electric Drives and Hybrid Cars
- Active Sound Design and Active Components
- Drive Train Acoustics (Engine, Gearbox, Drive Shafts)
- Infotainment in the Vehicle
- Multi-Modality – Noise and Vibrations
- Numerical Methods, Simulation, Virtual Reality
- NVH Measurement, System-Analysis, Measurement Technology
- Sound Quality, Trouble-Shooting, Sound Design
- Vehicle Acoustics (Body, Mechatronic Components, Tire Road Noise)

**PLENARY SPEAKERS**

- Prof. Dr. Jesko Verhey  
  Otto-von-Guericke University Magdeburg
- Tobias Hillers  
  Dr. Ing. h.c. F. Porsche AG
Next year the Aachen Colloquium will take place for the 33rd time. You are warmly invited to submit a lecture proposal on one of the main topics. You will find the submission form on our website from December 2023: [https://www.aachener-kolloquium.de/en/](https://www.aachener-kolloquium.de/en/)

### Important Dates

- **Deadline for abstracts**
  - February 2024
- **Notification of the authors**
  - from April 2024
- **Deadline for submission of the manuscripts for the conference proceedings**
  - August 2024

#### Main Topics for 2024

**Full Vehicle & Mobility Concepts**

- Data-driven Development Processes: Processing, Use, Protection and Evaluation
- Chassis & Vehicle Dynamics
- Functional Safety
- Sustainability, Recycling, LCA & Balances
- New Vehicles, Architectures & Interior Concepts
- Strategies and Business Models of the Automotive Industry: Sustainable / Digital / Multimodal / ...
- Zero-Impact Emission Concepts

**Drive Technologies**

- Alternative Fuel Application
- Battery Systems, Management & Safety
- Vehicle Electrical Systems & 48V Technologies
- Fuel Cells
- Electrification & Hybridization
- Energy & Thermal Management

**Digitalization and Automation**

- Automated Driving (Level 3+), Databases & AI
- Digital Development Process: Digital Twin, AI, Methods and Simulation
- Driver Assistance & Connected Driving (ADAS)
- Innovative E/E Vehicle Architectures
- Sensors & Perception of Environment in Vehicles and Infrastructure
- Software Development for the Automobile (incl. Cyber Security)
- Traffic Simulation and Scenarios

34. Aachen Colloquium Sustainable Mobility

October 7th – 9th, 2024
Registration

Since the beginning of May 2023

We recommend an early registration. The terms and conditions of the Aachen Kolloquium GbR are available on the event website: https://aachener-kolloquium.de/en/terms-and-conditions-gtc.html

Procedure of Registration
1) Registration (only online via www.aachen-colloquium.com/registration
2) Receive confirmation by e-mail
3) Settle the invoice
4) Registration completion after Receipt of payment

Participation Fee
Participation Fee: 1310,- €*
Participation Online: 750,- €*

University Members 50 % Discount*
*All prices are exclusive of VAT.

Payment Delays
In accordance with the terms and conditions, the participant fees must be paid by the due date stated on the invoice and at the beginning of the event. Please contact us if you are unable to meet this requirement.

Conference Documents
Licences for single or multiple use of the complete conference proceedings as well as individual papers can only be ordered online via www.aachen-colloquium.com/proceedings

Conference Language
The lectures will be given in English only. The proceedings will be published in English only.

Conference Office
- Monday, Oct. 9th, 2023 04:00pm - 07:00pm
- Tuesday, Oct. 10th, 2023 07:30am - 06:00pm
- Wed., Oct. 11th, 2023 07:30am - 05:00pm

Scientific Management
Univ.-Prof. Dr.-Ing. Lutz Eckstein
Director ika
RWTH Aachen University

Univ.-Prof. Dr.-Ing. Stefan Pischinger
Director TME
RWTH Aachen University

Organization
Gunnar Böttcher
Ferris Herkenrath
